DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/17/03 has been entered.

Response to Remarks

2. Applicants' arguments and amendments, filed on 1/17/03, have been approved and entered. They have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either newly applied or reiterated. They constitute the complete set presently being applied to the instant application.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1637

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 71-79 are rejected under 35 U.S.C. 102(b) as being anticipated by Chamberlin et al. (WO 95/20682).

Chamberlin et al. discloses the addition of osmolytes such as dimethyl glycine, to sequencing reactions and PCR as they are known to destabilize double-stranded DNA, thereby lowering the T_m of the DNA analyzed (see abstract and pages 8-12).

Moreover, osmolytes are generally known to stabilize proteins and protect them from denaturation under stress conditions, such as heat.

5. Claims 55-70 are allowed.
